DMK Enzyme Therapy

Enzyme therapy works with the internal functions of the skin to increase, circulation, oxygenation and lymphatic drainage by using reverse osmosis to 'back flush' fluids through the cell wall, leaving a clean, clear, toxin free skin matrix. Enhances collagen production strengthening and firming the skin and can also induce the 'plasmatic effect' in the skin by dilating of the peripheral capillaries and improving cellular oxygen uptake and delivering fresh nutrients to the skin. Enzyme therapy is the only treatment of its kind in the world and uses transfer messenger enzymes to enhance optimal skin function

Rejuvenating Peel

\$119

A professional treatment that performs a controlled micro- removal of epidermis. Using a pharmaceutical-grade combo of AHA's and BHA's with minimal downtime leaving the skin instantly radiant and glowing. For added results & glow we suggest LED as the perfect add on.
